	Total			42000
Grand Total				100800

3. Picture

People are motivated as they have some materials to use while preparing this school budget. But there are some materials missing in order to achieve their target, such as ICT tools etc... also some people didn't attend the meeting due to lack of transport but there is a chance of reaching our target because many constructive ideas have been given during this meeting and there is a hope of being implemented because people are involved in this activity. Also, our school is well placed as it is located near the lake and different kind of food are available local with low price.
